ABOUT *US*

Since 1985, **Usluoğlu** has been operating in the field of mold manufacturing and plastic injection parts production, providing integrated solutions that combine design, mold production, and plastic injection processes. With a strong focus on quality, sustainability, and engineering precision, the company has established a solid position in the industry through reliable production processes and a commitment to aesthetic and functional design.

Our company carefully analyzes customer requirements and manages every stage of the process — from design to mass production — with precision and efficiency. With a team of experienced engineers, technicians, and skilled mold specialists, we aim to deliver practical, cost-effective, and customized manufacturing solutions for every project.

Since 2015, Usluoğlu has continued its production in a **2,600 m² modern facility located in İzmir Atatürk Organized Industrial Zone**. Equipped with advanced CNC machines, plastic injection systems, and **clean room production areas**, our facility enables us to maintain high-quality manufacturing standards.

With decades of experience and a continuous improvement mindset, we remain committed to providing our customers with **the right quality, at the right time, and at the right cost**, continuing to serve as a reliable solution partner in the industry.
